Education

University of Washington Seattle, WA

M.S. in Human Centered Design and Engineering

Sep 2025 - Expected Graduation: Jun 2027

University of California, Los Angeles Los Angeles, CA

B.A. in International Development Studies, minor in Digital Humanities

Sep 2023 - Jun 2025

Experience

UX Design Intern @ Mavericks in Motion Inc.

May 2025 – Aug 2025 | Seoul, South Korea

[B2C wellness **start-up**]

- Led designing ROL, a mobile routine app that helps users plan their daily lives and establish sustainable habits, while collaborating cross functionality with front and back-end developers
- Managed 10+ prototyping and user testing before and after the app launch, and oversaw QA usability and design testing which led to 25% decrease in error
- Designed and ideated a mobile interface of new AI feature that recommends users with a personalized routine
- Analyzed the current wellness market and defined the MVP to accelerate app launch in early stage

UX/UI Designer @ Creative Labs.

Jan 2025 – Mar 2025 | Los Angeles, California

[**Community service** mobile app]

- Designed Ripple, a mobile app that gamifies contributions, empowering users to make a donation through community services. Established the MVP, defined design system, designed the logo, and produced wireframes and high-fidelity prototypes
- Prepared and reported weekly updates of the project for 12 weeks while facilitating effective communication between co-designer and developers

Digital Marketing Intern @ Telechips.

June 2024 – Sep 2024 | Gyeonggi, South Korea

[Fabless **semiconductor company**]

- Designed an engaging marketing flyer with the intention of semiconductor company's Single Board Computer (SBC), TOPST after conducting market research and identifying a unique strength that sets it apart in SBC industry
- Presented TOPST at the IEEE CASS conference, which contributed to achieving $500 revenue in a day
- Prepared weekly updates for 8 weeks and created a report every month, tracking growth and success rates of marketing campaigns

Projects

Overleaf Re-design @ University of Washington

Jun 2025 – Sep 2025

[**University of Washington, Design for Passion 2025**]

- Interviewed 6+ users and found out 3 main pain points that emphasizes usability issues in the current Overleaf design
- Improved auto fix and suggestion flow through re-designed AI feature, that makes users easier to understand the errors and search through the correct type of suggestion needed
- Ideated and designed Task Board, a AI based feature that improves collaboration flow by automatically transforming chats into tasks, resulting in a 78% increase in user satisfaction, and 45% decrease in task completion time

Duo Mobile App Re-design

Sep 2024 – Nov 2024

[Personal Project]

- Conducted direct interviews with 7 interviewees with the intention of solving existing problems of the current design of Duo Mobile; found out users wanted more seamless and diverse ways of verifications
- Provided users with a re-designed app interface with new web interfaces that increased user satisfaction by 44.8% and perceived ease of use by 21.1%
