User Experience Designer with 1 year of experience leading **end-to-end app launches** across wellness and productivity platforms, **based in Seattle**. Skilled in software design, user research, data analysis, and prototyping.

EDUCATION

University of Washington

M.S. in Human-Centered Design and Engineering

Sep 2025 – Jun 2027 (Expected)

University of California, Los Angeles (UCLA)

B.A. in International Development Studies; Minor in Digital Humanities

Sep 2023 – Jun 2025

WORK EXPERIENCE

Mavericks in Motion Inc. — UX Design Intern

Jun 2025 – Aug 2025 • Seoul, Korea

A wellness startup building a B2C mobile app that empowers users to build mindful routines through community-driven experiences.

- As a founding UX designer of ROL, led end-to-end UX design for a wellness mobile app, from research and ideation to prototyping and usability testing, to help users organize daily routines and build sustainable habits.
- Designed and delivered 10+ interactive prototypes, including login flows, AI interaction screens, and payment pages while ensuring accessibility.
- Reduced usability errors by 45% through iterative QA testing, while coordinating cross-functionally with developers and project manager.
- Ideated and designed an AI conversational interface that allows users to interact with and receive personalized daily plans.
- Built an early-stage design system to ensure visual and interaction consistency, improving designer-developer communication that enhanced collaborative efficiency.

Telechips — Digital Marketing Intern

Jul 2024 – Aug 2024 • Seoul, Korea

Leading fabless semiconductor company specializing in South Korea, for automotive and multimedia system-on-chip (SoC) solutions.

- Conducted market research to identify key differentiators of TOPST, the company's Single Board Computer (SBC), and designed marketing collateral that highlighted its competitive strengths.
- Represented TOPST at the IEEE CASS Conference, increasing brand exposure and contributing to \$700 in single-day sales.

VOLUNTEER & SIDE PROJECTS

Overleaf — UX Designer

Jun 2025 – Aug 2025 • Seattle, Washington

Collaborative web-based LaTeX editor for creating, editing, and sharing academic documents.

- Achieved 65% higher user satisfaction scores and 45% faster task completion compared to the existing workflow in A/B testing (n=20) by designing an AI-powered Task Board that converts chat discussions into actionable tasks.
- Improved perceived ease of use by 68% through a restructured user flow that simplifies error identification and streamlines the suggestion process.
- Conducted 6+ user interviews and identified major pain points, including scattered suggestion flow, unclear collaboration, and repetitive citation input to redesign Overleaf.

Duo Mobile — UX Designer

Sep 2024 – Nov 2024 • Los Angeles, California

A two-factor authentication (2FA) platform that keeps personal data secure.

- Conducted comprehensive UX research (qualitative interviews, surveys, usability studies) to identify major pain points and measure overall usability and enhanced user security and accessibility.
- Delivered a 44.8% increase in user satisfaction and a 21.1% improvement in perceived ease of use by redesigning the mobile app interface and providing users with a new web dashboard to enhance the user experience of multi-factor authentication.
