

Hajeong Hwang

UX & Product Designer

Experience

UX Design Intern Mavericks in Motion Inc.

Jun ' 25 – Aug ' 25
Seoul, South Korea

- As a founding UX designer of ROL, led end-to-end UX design for a wellness mobile app, from research and ideation to prototyping and usability testing, to help users plan daily routines and build sustainable habits
- Designed and delivered 10+ prototypes, including login flows, AI interaction screens, and payment pages
- Achieved a 45% reduction in usability errors through iterative QA testing, while coordinating cross-functionality with front-end and back-end developers
- Ideated and designed an AI conversational interface that allows users to interact with AI and receive personalized daily plans
- Built an early-stage design system to ensure visual and interaction consistency, improving designer-developer communication

UX/UI Designer Creative Labs

Jan ' 25 – Mar ' 25
Los Angeles, CA

- As a founding UX designer of Ripple, developed the MVP from scratch to launch, defined the design system, designed the logo, and produced wireframes and high-fidelity prototypes to build a mobile app that gamifies community service participation

Digital Marketing Intern Telechips

Jul ' 24 – Aug ' 24
Seoul, South Korea

- Conducted market research to identify key differentiators of TOPST, the company's Single Board Computer (SBC), and designed marketing collateral that highlighted its competitive strengths
- Represented TOPST at the IEEE CASS Conference, increasing brand exposure and contributing to \$500 in single-day sales
- Delivered weekly performance updates and created monthly analytics report to track market campaign growth and success rates

Projects

UX Designer Overleaf

Jun ' 25 – Aug ' 25
Seattle, WA

- Redesigned Overleaf, a collaborative web-based LaTeX editor for creating, editing, and sharing academic documents
- Conducted 6+ user interviews and identified major pain points, including scattered suggestion flow, unclear collaboration, and repetitive citation input
- Boosted user satisfaction rate by 78% and reduced task completion time by 45% through the introduction of an AI-powered Task Board that converts chat discussions into actionable tasks
- Improved perceived ease of use by 68% through a restructured user flow that simplifies error identification and streamlines the suggestion process

UX Designer Duo Mobile App

Sep ' 24 – Nov ' 24
Los Angeles, CA

- Redesigned Duo Mobile App, a two-factor authentication (2FA) platform, to enhance user security accessibility
- Conducted comprehensive UX research (qualitative interviews, surveys, usability studies) to identify major pain points and measure overall usability
- Delivered a 44.8% increase in user satisfaction and 21.1% improvement in perceived ease of use through a redesigned mobile app interface and updated web dashboards
