

Hajeong Hwang

UX & Product Designer

Experience

UX Design Intern
Mavericks in Motion Inc.

May ' 25 – Aug ' 25
Seoul, South Korea

- As a founding UX designer of ROL, led the design of a wellness mobile app from 0 to 1, with the intention of helping users plan their daily lives and establish sustainable habits
- Designed and delivered 10+ prototypes, including onboarding, sign in/ sign up, My Room, ROL AI, and payment pages
- Oversaw QA usability and design testing before and after the app launch, which led to a 25% decrease in error, while collaborating cross-functionality with front-end and back-end developers
- Ideated and designed a mobile interface for a new AI feature that recommends a personalized routine to users by combining LLMs with retrieval-augmented generation (RAG)
- Defined the solid design system in the early stage, which ensured design consistency and reducing the communication gap between designer and developers

UX/UI Designer
Creative Labs

Jan ' 25 – Mar ' 25
Los Angeles, CA

- As a founding UX designer of Ripple, designed a mobile app that gamifies community service contributions by empowering users to donate their time and skills
- Developed the MVP, defined the design system, designed the logo, and produced wireframes and high-fidelity prototypes

Digital Marketing Intern
Telechips

Jul ' 24 – Sep ' 24
Seoul, South Korea

- Designed an engaging marketing flyer with the intention of the semiconductor company's Single Board Computer (SBC), TOPST, after conducting market research and identifying a unique strength that sets it apart in the SBC industry
- Presented TOPST at the IEEE CASS conference, which contributed to achieving \$500 revenue in a day
- Prepared weekly updates for 8 weeks and created a report every month, tracking growth and success rates of marketing campaigns

Projects

UX Designer
Overleaf Re-design

Jun ' 25 – Sep ' 25
Seattle, WA

- Redesigned Overleaf, a web-based LaTeX editor for creating, collaborating on, editing, and sharing documents
- Interviewed 6+ users and identified three main pain points that causes usability issues in the current Overleaf design: suggestion, collaboration, and citation
- Resulted in a 78% increase in user satisfaction, and 45% decrease in task completion time by providing users with a Task Board; an AI-based feature that improves collaboration flow by automatically transforming chats into tasks
- Perceived ease of use increased by 68% through restructuring user flow and redesigning the interfaces of the current AI feature, which makes errors easier to identify and streamlines the suggestion flow

UX Designer
Duo Mobile App re-design

Sep ' 24 – Nov ' 24
Los Angeles, CA

- Redesigned the Duo Mobile App, a two factor authentication (2FA) platform which provides additional security to account
- After conducting direct interviews with 7 participants, documented the results using the affinity diagramming, and identified the main pain points that come from the complex and single means of verification
- Provided users with a redesigned app interface and new web interfaces, which resulted in a 44.8% increase in user satisfaction and 21.1% improvement in perceived ease of use

(424)-465-0276

Education

University of Washington, Seattle
Sep 2025 – Expected Jun 2027

M.S. in Human-Centered Design & Engineering

University of California, Los Angeles (UCLA)
Sep 2023 – Jun 2025

B.A. in International Development Studies
Minor in Digital Humanities

Skills

UX/UI Design	Prototyping
User Research	Usability Testing
Design Thinking	Product Strategy
Wire Framing	Data Analysis
Personas	Data Visualization
Design Systems	Branding

Tools

Adobe Creative Suite	Figma
+ Photoshop	Sketch
+ Illustrator	Framer
+ XD	HTML/CSS
+ Premiere Pro	ArcGIS
	Squarespace

Involvements

Creative Labs UCLA, KOJOBS

Awards & Certification

Foundations of UX Design (Google),
2025 Los Angeles Geospatial Competition
(Selected for presentation)
