

Hajeong Hwang

UI/UX & Product Designer

Experience

UX Design Intern

Mavericks in Motion Inc.

May ' 25 – Aug '25
Seoul, South Korea

- As a founding member of ROL, led the design of a wellness mobile app from 0 to 1, with the intention of helping users plan their daily lives and establish sustainable habits
- Managed 10+ prototyping and user testing before and after the app launch, and oversaw QA usability and design testing, which led to a 25% decrease in error, while collaborating cross functionality with front and back-end developers
- Designed and ideated a mobile interface for a new AI feature that recommends a personalized routine to users

UX/UI Designer

Creative Labs

Jan ' 25 – Mar ' 25
Los Angeles, CA

- As a founding member of Ripple, designed a mobile app that gamifies contributions by empowering users to donate community services. Established the MVP, defined the design system, designed the logo, and produced wireframes and high-fidelity prototypes
- Established the MVP, defined the design system, designed the logo, and produced wireframes and high-fidelity prototypes

Digital Marketing Intern

Telechips

Jul '24 – Sep ' 24
Seoul, South Korea

- Designed an engaging marketing flyer with the intention of the semiconductor company's Single Board Computer (SBC), TOPST, after conducting market research and identifying a unique strength that sets it apart in the SBC industry
- Presented TOPST at the IEEE CASS conference, which contributed to achieving \$500 revenue in a day
- Prepared weekly updates for 8 weeks and created a report every month, tracking growth and success rates of marketing campaigns

Projects

UX Designer

Overleaf Re-design

Jun '25 – Sep ' 25
Seattle, WA

- Re-designed Overleaf, a web-based LaTeX editor that is for creating, collaborating, editing, and sharing documents
- Resulted in a 78% increase in user satisfaction, and 45% decrease in task completion time through the newly designed Task Board, which is an AI-based feature that improves collaboration flow by automatically transforming chats into tasks
- Perceived easiness of the app increased by 68%, by improving auto-fix and suggestion flow through re-designed AI feature, by making it easier for users to find out the errors, and streamlining the way suggestions are displayed
- Interviewed 6+ users and found out three main pain points that cause usability issues in the current Overleaf design: suggestion, collaboration, and citation

UX Designer

Duo Mobile app re-design

Sep '24 – Nov ' 24
Los Angeles, CA

- Redesigned the Duo Mobile App, an authentication platform that provides additional security
- Re-designed app interface and designed new web interfaces, which increased user satisfaction by 44.8% and perceived ease of use by 21.1%. By conducting the direct interviews with 7 interviewees, found out the main pain points of the Duo Mobile App, which come from the complex and single means of verification

Education

University of Washington

Sep 2025 – Expected Jun 2027

M.S. in Human Centered Design & Engineering

University of California, Los Angeles (UCLA)

Sep 2023 – Jun 2025

B.A. in International Development Studies
Minor in Digital Humanities

Skills

UX/UI Design	Prototyping
User Research	Usability Testing
Design Thinking	Product Strategy
Wire Framing	Data Analysis
Personas	Data Visualization
Design Systems	Branding

Tools

Figma	Prototyping
Sketch	Usability Testing
Design Thinking	Product Strategy
Wire Framing	Data Analysis
Personas	Data Visualization
Design Systems	Branding

Involvements

Creative Labs UCLA, KOJOBS

Awards & Certification

Foundations of UX Design (Google),
2025 Los Angeles Geospatial Competition
(Selected for presentation)
